Asger Mindegaard explores how ‘agroecology’ can make our food production more resilient, rebuild healthy ecosystems and perhaps even prevent future outbreaks like COVID-19. Biting into a delicious sandwich is – literally – like biting into one of the major challenges of our time.

Agroecology: Farming for a better future? – META

The Advances in Agroecology series focuses on the study of agriculture and agricultural processes from an ecological perspective, which emphasizes interrelationships between living organisms and their environment. The series documents research into the ecological basis of agriculture that maximizes the use of inputs from biological, cultural, and ecological processes while minimizing the use of expensive chemical inputs.

Routledge & CRC Press Series: Advances in Agroecology
