Notes. This article uses the standard notation ISO 80000-2, which supersedes ISO 31-11, for spherical coordinates (other sources may reverse the definitions of θ and ϕ):
• The polar angle is denoted by θ : it is the angle between the z-axis and the radial vector connecting the origin to the point in question.;
• The azimuthal angle is denoted by ϕ : it is the angle between the x-axis and the ...

High precision calculator (Calculator) allows you to specify the number of operation digits (from 6 to 130) in the calculation of formula. The Calculator automatically determines the number of correct digits in the operation result, and returns its precise result. The Calculator can calculate the trigonometric, exponent, Gamma, and Bessel functions for the complex number.
